

S. O. S

SURVIVOR OR STATISTIC which will your child be?

FREE!

SEMINAR

Why is the Survivor or Statistic Seminar important for Teen Drivers and their parents?

- More than 6,000 teens die in car crashes each year
- Over 300,000 are seriously injured each year
- 80% of all teens will have a crash within the first two years of driving
- Insurance rates for teen drivers are 2 to 3 times more than other age groups

Does the typical Driver's Ed Program prepare the Teen to become a skilled driver? No!

- The typical program teaches the basics to "just get a license"
- It does not teach the teen life saving car control skills
- It does not teach the limitations of cars, conditions, or self

What does a teen driver need to learn to become safe driver?

- Their own limitations as a driver
- The limitations of the road conditions
- The limitations of the car
- The dynamics of a 4 or 5 thousand pound vehicle in motion

How to maximize your kids chances to survive our driving environment.

- Get more information
- Get more strategies that are effective
- Define your objectives and implement your plan

Every Family Attending Receives:

- A "Rite of Passage" Driving DVD
- A Complete Driving Log
- A Family-Teen Driving Contract
- A Program to Learn Standard Transmissions
- And Break-Through Strategies

Parents Comments:

"... the best two hour investment you'll make in your teenager's driving safety."

"... should be mandatory for every family before a teenager gets their license."

"... interesting and informative . I (parent) even learned a few things."

City of Rancho Santa Margarita Bell Tower Community Center
